Ultrapac® Extreme

The industry's hottest ultra-powerful prespray uses state-of-the-art nanotech “micro-robots” to bind and suspend soils for fast and efficient removal. A complex buffering system keeps the pH stable, plus its new Hydrocoating Technology means it's fast-dissolving even in cold water and stable up to 212°F / 100°C. The RTU will not separate and can be stored for several weeks. Ultrapac Extreme is not just for carpets - use it on tile and grout and be amazed by the results. See the User Guide (in "Documents" below) for full instructions.

FEATURES

- Nano-technology outcleans other pre-sprays at an economical price
- Hydrocoating Technology ensures fast and complete mixing – even in cold water – and won't separate or in harden your Hydro-Force or other pressure applicator!
- Perfect for tile and grout also - no need to carry separate presprays! (Not recommended for soft carbonate-based stone and glazed tiles.)
- RTU solution is perfectly clear and can be stored.
- Performance is unaffected by water hardness up to 24 grains.

SPECIFICATIONS

- **DILUTION PUMP SPRAYER:** 1 scoop per gal. of water (using provided scoop)
- **DILUTION INJECTION SPRAYER:** 8 scoops per 5 qts. of water (using provided scoop)

SIZES ▪ OPTIONS

- **8.695-714.0:** Four 6 lb. / 2.7 kg jars
- **8.695-715.0:** One 40 lb. / 18.1 kg pail
- **8.695-716.0:** One 320 lb. / 145.0 kg drum
